PROJECTS

➢ **Job-Field**   (20th March 2023 – 27th March 2023)   **Live Link | Source Code**

It's one kind of Job-Hunting website.
- In this website you can find the job post and also can apply for those posts.
- You can store the selected post in the local storage.
- You can also check the details of the particular job.

Technologies: React, React Router, JSON Data, Tailwind CSS.

➢ **Food-Corner**   (25th April 2023 – 1st May 2023)   **Live Link | GitHub: Client | Server**

It's one kind of online restaurant. From where we can buy food through online and can book a table in the restaurant.
- In this website there are some information about the chefs of the restaurant. We can see their popularity, experience in it. By clicking VIEW RECIPE button we can able to see their best dishes and also can mark as a favorite one.
- Implemented private route so that without registration, not a single user can access the chef's popular items. Used Firebase Authentication for the security of the webpage.

Technologies: React, React Router, Node JS, Express, MongoDB, Tailwind CSS.

➢ **Toys-Center**   (16th May 2023 – 21st May 2023)   **Live Link | GitHub: Client | Server**

Toys-Center is a toy E-commerce web platform.
- Implemented Authentication for user Login and Registration. User can't access the private routes without Login.
- Seller can Add his advertisement and it will be stored in his profile that which items he added. He can also edit and delete the added item from the database.
- In one section we show all the items that is added by all the seller from different emails.

Technologies: React, React Router, Node JS, Express, MongoDB, React Hook Form, Tailwind CSS.
